Dear Marla, Chad, and Joe,

You may well have already seen and/or leveraged this, in which case my apologies for the redundancy. Please find a link below (and a PDF version attached) that spells out the Permanent Rules Related to the Colorado Retail Marijuana Code, dated September, 2013. It is a fairly detailed document that covers Colorado's rules for Cultivation, Manufacturing, and Retail operations.

<http://www.colorado.gov/cs/Satellite?blobcol=urldata&blobheadername1=Content-Disposition&blobheadername2=Content-Type&blobheadervalue1=inline%3B+filename%3D%22Retail+Marijuana+Rules%2C+Adopted+090913%2C+Effective+101513.pdf%22&blobheadervalue2=application%2Fpdf&blobkey=id&blobtable=MungoBlobs&blobwhere=1251888487553&ssbinary=true>

As you proceed with the revision of the proposed NV statutes, I thought the Colorado rules might prove to be a good resource, as they contain specific language around certain topics (e.g., sanitation) that I think have both the breadth and specificity we seek here, without going into so much detail as to potentially create an "impossible" situation.

For instance, in Section 504(b)(9) on page 56 it spells out cleaning requirements for a cultivation facility:

I note that the language above is quite broad, yet also steers clear of terms like "aseptic," or specific cleaning instructions and schedules for different types of surfaces and equipment, etc. As such, it puts the onus on the cultivator, which is, I believe, appropriate. (They do go on to list specific banned substances, etc.)

Please take this resource for what it is worth. I just wanted to make sure you are aware it is there, as I believe it could prove useful.

Regards, and Happy New Year!  
Shane
